

Life-cycle Wheel Directions:

Materials: 12 in. x 9 in. construction paper, circle cut-out about 6 $\frac{1}{2}$ inches, brad or paper fastener, colored pencils, markers, or crayons

1. Fold the construction paper in half. Cut a window on the top page of the construction paper. Vary the size and shape of the window to fit different animal life cycles.

2. Cut out the circle. Divide the circle into 4 equal parts with a light pencil line. Place the circle on the right side of the folded construction paper so that the edge of the circle protrudes slightly from the edge of the page.

3. Place the brad through the center of the circle and the construction paper.

4. Glue or draw the life cycle of a plant or animal (one picture in each quarter of the circle).
