The Alaska Seas and Rivers Project Needs YOU!

If you teach elementary or middle school, you can earn up to $200 for piloting the newly developed Alaska Seas and Rivers Curriculum in your classroom.

If you currently teach elementary or middle school science in a single or multigrade classroom, please consider implementing and reviewing one of our 3-5 week units of instruction with your students.

To receive the $200 stipend, you must implement at least 80% of the unit, and complete a pilot review form. If you are unable to implement an investigation or activity, you will still be required to review the activity and provide input. Your input is important to help ensure the curriculum is appropriate for Alaska classrooms.

The following units are ready for piloting in August 2008:

**Primary Grades (K-2)**
- Discovering our Blue Planet
- Plants and Animals of Seas and Rivers
- At Home in the Water

**Intermediate (3-5)**
- Rivers to the Sea and Back Again
- The Case of the Missing Sea Otter
- Humans and the Ocean

The following units will be ready for piloting in September 2008:

**Middle School (6-8)**
- Exploring the Ocean
- Ocean in Motion
- Our Changing World

Preview the units at the Alaska Seas and Rivers website at [www.alaskaseagrant.org/teachers](http://www.alaskaseagrant.org/teachers).

For piloting details, contact Marla Brownlee at marlabrownlee@mac.com.
