

# STATION #3: MACRO MAYHEM

Using the **Index of Water Quality** identify and categorize each macro-invertebrate you find.

## School Stream Site

Indicator	Names of Invertebrates Found
Good Quality	
Neutral Quality	
Poor Quality	

## Data Analysis

Salmon require an index of water quality of \_\_\_\_\_ to survive.

Based on the index of water quality-macro invertebrates, could salmon survive in our stream/watershed? *Yes or No & Why?*
